**Tips for travelling with tots this summer**

**1. Get creative** - Holidays abroad could be a bit of a culture shock, so try some holiday themed activities before you go. Get your children to look at books, draw pictures and find the destination on a globe. Even try cooking some of the local cuisine to get taste buds ready.

**2. That's my bag** - Help your child pack their very own bag full of toys to keep them entertained on the plane and beyond. Make sure it includes games for the beach and inflatables for the pool.

**3. First aid** - Put together a medicalkit of health essentials to ease any heat related maladies, as you may not be able to track them down when abroad. Includes sunscreen.

**4. Check up** - You may or may not need to visit the doctor yourself for a course of inoculations and it is best to check what jabs your children may need before you jet off.

**5. Layering** - Pack wisely for the heat. Natural fibres are best as they will not irritate sensitive skin. Layering is the best way to deal with changeable temperatures. Hats are a must best with a neck flap and a wide brim. Also sunglasses.

**6. Shelter** - Invest in an easy to put up tent style shelter for the beach. These double up as a

shelter from the sun and a wind break. An enticing way to get children to come into shade.

**7. Cool activities** - Plan activities away from the blazing heat of the beach or poolside such as an amble around the shops, perhaps in search of some traditional, local toys to take back, or lunch at a shady cafe with canopies.

**8. Water**, water, water - Make sure your child keeps hydrated. It can be difficult to get children to drink water so try different things like squash and even ice lollies.

**9. Dip** - Take a dip in the sea or pool with your child to cool down or even take a small paddling pool with you, set up next to sunbathing.

**10. Relax** -Finally, just remember to take it easy. There is nothing worse for raising the temperature of parents and children alike than trying to schedule in too many activities.

## Out & About

# Kids Go Racing For FREE!

There aren't many places that you can take the kids for free in the school holidays but horseracing is a great exception with under 16s getting in free at courses across the country. And, as well as spectacular horse racing, the chance to get some fresh air and see the equine

stars strut their stuff, the budding young jockeys in your family will also be able to find out more about the Sport of Kings at the new *Kids love the Races' Roadshow*. From weighing in and seeing how they measure up to some of the sport's most famous faces, to

designing their own racing silks, kids will also be able to take a look at some specialist racing equipment and have fun learning about one of the country's most popular spectator sports. There's also the chance to learn more about some of racing's most famous equine stars including *Frankel*

and *Kauto Star*, and find out what these half ton animals eat to keep them in tip top condition. And the fun and games don't stop there as most courses provide free bouncy castles and face painting as well as junior racebooks so children can learn about the runners and

riders participating on the day. There are over 200 racing fixtures taking place during the summer holidays where kids go free. To find out about what's happening in your area, and the dates of the *Kids love the Races Roadshow* [www.lovethehorses.com/kids-go-free](http://www.lovethehorses.com/kids-go-free)

**Education Back to School**

**Stock the Medicine Cabinet before the School Bell Rings**

Whilst it's nice for parents to have their children back at school after the summer holidays, September also fills some parents with dread due to their children's "sickness surge" as we approach the winter months. After just a few weeks into the school term the nurse's office will be packed with coughing children and classrooms full of runny noses.

**Hand washing**  
**Sultan Dajani**, a registered pharmacist with over 20 years experience and Board member of the *Royal Pharmaceutical Society* says, "This is such a basic but important concept that should be drilled into children from a young age - always wash your hands before you eat something. Make the occasion fun by teaching your kids a nursery rhyme to sing whilst they wash."

**Chickenpox**

The infection is spread quickly and easily through the coughs and sneezes of someone who is infected. It causes a rash of red, itchy spots that turn into clear fluid-

filled blisters. These crust over to form scabs which eventually drop off. Some children only have a few spots but in others they can cover the entire body. The spots are very itchy so use **Care ViraSoothe Chickenpox Relief Cooling Spray Gel** or **Care ViraSoothe Chickenpox Relief Cooling Spray Gel**, a breakthrough treatment that is clinically proven to help relieve the irritating symptoms of chickenpox.

Effectively cooling the skin, it helps stop the itch-scratch infection cycle. Its special formula protects the skin's natural environment to allow the infected area to heal naturally and help to reduce long-term scarring.

Sultan Dajani comments: "**Care ViraSoothe** is the only clinically proven gel for relieving chickenpox symptoms such as skin irritation, by cooling and relieving itching thus helping ease the child's misery. It should be applied 2-3 times a day or as required."

**GP Dr Sarah Jarvis** adds "If your little one has chickenpox remember to call their school or nursery to let them know. It's also wise to avoid visiting people in hospital and be mindful around the elderly or pregnant women."

**Care ViraSoothe** Chickenpox Relief Cooling Gel costs £5.73

for 50g and £8.33 for 75g and is available from independent pharmacies, *Boots, Tesco, Sainsbury's, Co-Op pharmacy, Lloyds, Rowlands, Asda pharmacy and Superdrug.* **Care ViraSoothe** Chickenpox Relief Cooling Spray Gel costs £8.49 for 60ml and is available from independent pharmacies, *Boots, Lloyds and Tesco pharmacy.*

**Coughs and colds**  
Coughs and colds are widespread amongst school children, but if you prepare in advance by stocking up on various medicines you can prevent these minor illnesses from affecting your child's attendance record.

**Dr Sarah Jarvis** comments: "Colds are caused by around 200 different viruses which infect the head and chest and make you feel miserable for up to 10 days. They cannot be cured by antibiotics but with a little TLC, you can support your child's body as it fights the virus and help by providing relief from the symptoms." Soothe an inflamed throat and relieve dry, irritating coughs with **Care Simple Linctus Paediatric**. It works instantly by forming a comforting film over your child's sore throat and can be used for children from 1 year old.

## Is my child dyslexic? Recognising the signs...

According to the recent report *A Fish in the Tree* <http://driveryouthtrust.com/wp-content/uploads/2013/04/DYT-FishintheTree-LR.pdf> by The Driver Youth Trust on average, 3 children in every classroom are dyslexic and struggle with literacy - this equates to 1.2 million in the UK. Reading and writing is essential when it comes to the intellectual development of a child. But if a child has literacy problems like dyslexia, this development becomes even more challenging.

Though dyslexia is categorised as a disability, if you see the signs and catch it early

enough, using the right tools and techniques, your child should have a good chance of developing at the same pace as every other pupil in their class.

Here are some frequently asked questions that can help you to determine if your child is dyslexic :

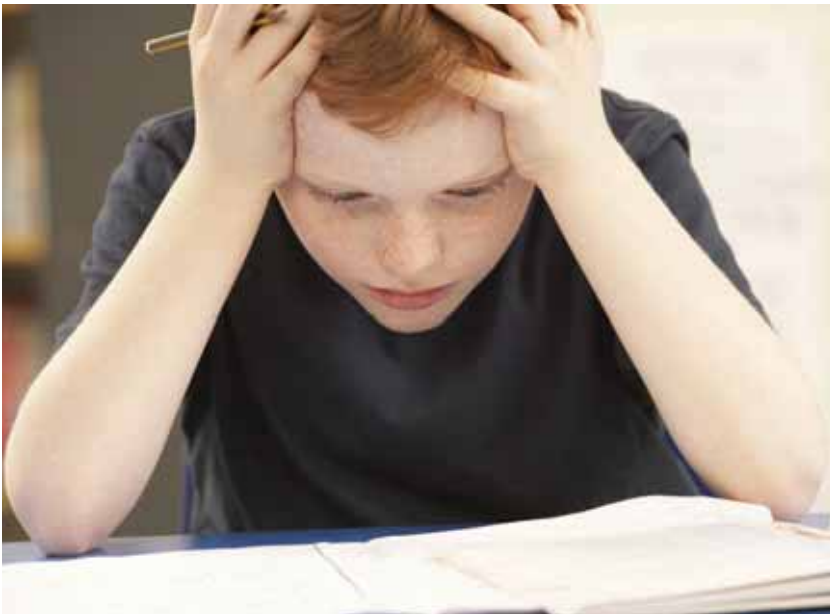

1. Firstly, dyslexia is hereditary so do you or anyone in your family have dyslexia?
2. Does your child display poor concentration and are they easily distracted?
3. Is their performance in class below average compared to their classmates?
4. Do they struggle with their 'b's and 'd's', 'p's and 'q's

and use them the wrong way round?

5. Do they have difficulty following instructions especially if they are written?
6. When reading out loud, do they miss words or add words that are not included?
7. Do they take longer to read compared to other children their age?
8. Are their oral skills noticeably more developed compared to their reading and writing skills?
9. During activities, do they prefer to keep to themselves rather than play with others?
10. Do they have a headache or tummy ache on the days they have a particular

lesson that they do not like? Should your child experience most of these indicators, it is likely that they have some degree of dyslexia. Identifying that your child has dyslexia is the first step and early identification is crucial. With a combination of technology and techniques, your child has every opportunity to overcome dyslexia at school, at home and ultimately, at work.
